According to our (Global Info Research) latest study, the global Industrial Rigid Casters market size was valued at USD 891.6 million in 2023 and is forecast to a readjusted size of USD 1221.7 million by 2030 with a CAGR of 4.6% during review period.

Industrial rigid casters are sturdy and fixed wheels designed for industrial applications where stability and straightforward movement are essential. Unlike swivel casters, rigid casters do not rotate and move only along a straight line. They are commonly used in scenarios where the direction of movement is predictable, and stability is crucial, such as in heavy-duty carts and equipment that require straight-line navigation.

The market for industrial rigid casters is integral to industries that prioritize stability and linear movement in their material handling processes. These casters find applications in manufacturing plants, warehouses, and other industrial settings where the movement path is predetermined. Market trends may involve innovations in materials and design to enhance load-bearing capacity and durability in rigid caster applications.
