Abstracts

An Infant Incubator is a piece of equipment common to pediatric hospitals, birthing centers and neonatal intensive care units. While the unit may serve several specific functions, it is generally used to provide a safe and stable environment for newborn infants, often those who were born prematurely or with an illness or disability that makes them especially vulnerable for the first several months of life.

Scope of the Report:

This report focuses on the Infant Incubator in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

North America is the largest consumption place, with a consumption market share nearly 33% in 2016. Following North America, Europe is the second largest consumption place with the consumption market share of 26% in 2016. Asia, South America, etc. are also important sales regions.

Market competition is intense. With the development of society and the changing of consumer demand, the Infant Incubator industry will be more and more popular in the future.

The worldwide market for Infant Incubator is expected to grow at a CAGR of roughly 8.0% over the next five years, will reach 720 million US\$ in 2023, from 490 million US\$ in 2017, according to a new GIR (Global Info Research) study.

Market Segment by Manufacturers, this report covers
