The inflatable cable duct sealing system is a new type of cable duct sealing device, specially used to seal cable-related duct openings. Its core component is the inflatable pipe plug, which is composed of a sealed air bag made of aluminum foil composite material. It uses the principle of inflation and expansion to achieve the blocking effect of the pipe hole. The inflatable cable duct sealing system improves maintenance speed and reduces maintenance costs. It is widely used in various cable duct sealing scenarios and can effectively ensure the safe and stable operation of cable ducts.
