## Abstracts

According to our (Global Info Research) latest study, the global Inflatable Pet Bed market size was valued at US\$ 772 million in 2025 and is forecast to a readjusted size of US\$ 1392 million by 2032 with a CAGR of 8.8% during review period.

In 2025, the global production of inflatable pet bed is approximately 15 million units, with an average selling price of about \$50 per unit, a gross profit margin of around 45%, and a single production line capacity of about 300,000 units per year. An inflatable pet bed is a pet resting product designed for portability and comfort. It solves the problem of pets needing a comfortable resting place outdoors or while on the move. It is a portable pet resting mat that forms a support structure by inflating air. Its core features are portability, foldability, and ease of storage. The upstream of the inflatable pet bed industry mainly consists of the petrochemical industry, which provides the core raw materials needed to produce the bed body, such as PVC and TPU plastic granules, nylon fabric and other textile materials, as well as valves. The midstream is the manufacturing and assembly stage, including processing raw materials into finished inflatable beds and integrating purchased accessories such as small air pumps. Production is typically outsourced by brands to specialized inflatable product factories. The downstream is ultimately sold to consumers through online e-commerce platforms and offline channels such as pet stores and supermarkets. The demand stems primarily from the growing number of modern pet owners who 'travel with their pets,' including trips, camping, and outdoor activities. The core driving force is the urgent need for portability, space-saving storage, and providing pets with temporary, comfortable resting places.

The market growth of inflatable pet bed is mainly driven by three core forces: First, the

popularization of outdoor lifestyles. With the rise of camping with pets and short-distance self-driving trips, lightweight and foldable inflatable beds have become essential equipment for pets' travels. Second, the intensification of urban living space. Young pet owners prefer home products that are easy to store and can be inflated and used immediately, to meet the dual demands of small-sized apartments for flexibility and multi-functionality. Third, the upgrading of pet health care awareness. The high fences and zoned support design can help relieve the joint pressure of elderly pets and reduce health problems caused by cold and damp floors.
