The global Inflatable Protective Vest market size is expected to reach \$ 628 million by 2032, rising at a market growth of 10.3% CAGR during the forecast period (2026-2032).

Inflatable protective vest is a new type of intelligent protective equipment, which is equipped with an inflatable triggering device and a buffer airbag structure. It can quickly inflate and expand in the event of sudden danger such as falls or collisions, providing cushioning, decompression, and protective support for key parts of the human body such as the chest, back, waist, abdomen, shoulders, and neck. It effectively reduces the damage caused by collisions and impacts, is lightweight, easy to wear, and has strong adaptability. It is widely used in various scenarios such as motorcycle riding, equestrian, outdoor operations, and elderly protection. In 2025, the sales volume will be 550000 pieces, with an average price of 570 US dollars, a single line production capacity of 50000 pieces, and a gross profit margin of 48%.
