Inkjet Capsule & Tablet Printing Machine is a highly specialized piece of equipment used in the pharmaceutical and nutraceutical industries. It operates based on the principle of inkjet technology. The machine precisely ejects tiny droplets of ink onto the surface of capsules and tablets. This is achieved through a complex system of print heads that are controlled by advanced software and electronics. The print heads can accurately adjust the size, velocity, and trajectory of the ink droplets to ensure a high-resolution and accurate print on the curved and often small surfaces of capsules and tablets.
