Abstracts

The global Inkjet Printer Head market size is expected to reach \$ 3319 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Inkjet heads also call inkjet print head is the core of inkjet printer. It is used on the industrial and commercial and office inkjet printer.

Inkjet print head can be divided into two categories by printing method: continuous print head and drop-on-demand print head. As continuous print head is waste of ink and print dots are large, the major manufacturers use the drop-on-demand print head.

The DOD arena breaks into Thermal Inkjet ('TIJ') and Piezoelectric Inkjet ('PIJ'). TIJ is widely used in the graphic arts market. PIJ heads work by applying voltage pulses to a piezoelectric material, which deforms in response and so ejects ink droplets from a chamber via a carefully engineered nozzle. Each printhead has hundreds or thousands of such chambers and nozzles

The main manufacturers of inkjet printer heads are HP, Canon, Epson, Fujifilm Dimatix and XAAR, the top three accounting for about 50% of the total manufacturing market.

North America is the largest market with about 40% of the market, followed by Europe with about 15%.

This report studies the global Inkjet Printer Head production, demand, key manufacturers, and key regions.
