Inline speed skates are a type of inline skate designed for speed and performance. They are a popular choice for inline racing, marathon skating, and fitness skating. The key features of inline speed skates include a low-cut boot design, a long frame, large wheels, and high-quality bearings. The low-cut boot design of inline speed skates allows for maximum ankle mobility and flexibility, enabling skaters to achieve more powerful and efficient strides. The long frame provides stability and better transfer of power, making it easier to maintain speed over long distances. The large wheels with a diameter of 100mm or more reduce rolling resistance and provide a smoother ride on uneven surfaces, while high-quality bearings ensure maximum speed and efficiency.
