Inorganic glass transparent parts refer to transparent parts or devices made of inorganic materials. Inorganic materials refer to materials that do not contain carbon elements, mainly including inorganic crystals, inorganic ceramics, inorganic glass, etc. These materials have excellent optical properties and chemical stability, making them widely used in the application of transparent components. Inorganic glass transparent components usually have the following characteristics: transparency: Inorganic glass and inorganic crystals have excellent transparency, allowing light to pass through and maintain a clear field of view, suitable for applications such as optical devices and transparent windows. Optical performance: inorganic glass transparent parts have high refractive index and dispersion, which makes them have important applications in Optical instrument, lasers, fiber communication and other fields. Hardness and wear resistance: Inorganic materials typically have high hardness and wear resistance, giving inorganic glass transparent parts advantages in terms of durability. Chemical stability: Inorganic materials have high stability towards chemical substances and can be used in corrosion-resistant chemical instruments and experimental equipment. High temperature stability: Inorganic glass transparent parts usually have good high temperature stability and are suitable for use in high-temperature environments. Inorganic glass transparent parts are widely used, including but not limited to the following fields: Optical instrument: such as lenses, prisms, windows, etc. Laser and fiber optic communication devices. Chemical experimental equipment and corrosion-resistant containers. Transparent components in the automotive and aerospace

industries. Transparent glass and windows in buildings. Medical devices and medical transparent parts. Due to the excellent performance and diverse uses of inorganic glass transparent components, they have been widely used in scientific research, industrial production, and daily life.
