According to our (Global Info Research) latest study, the global Instant Stew Bird's Nest market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Fresh stewed bird's nests generally refer to bird's nest products that are different from traditional dry bird's nests and ready-to-eat bird's nests. They are stewed using the fresh stew process, have a shelf life of 15 days with zero addition, and are delivered cold and fresh to your home on a weekly basis. Freshly stewed bird's nest ensures that the bird's nest is fresh, nutritious and delicious, and eliminates the tedious processes of pre-purchasing, soaking, picking, stewing and other dry bird's nests. Ready-to-eat bird's nests have a long shelf life and are difficult to guarantee nutrition, which opens up the problem of difficulty in ensuring nutrition. Bird's nest nourishes the era of freshly stewed bird's nest.

According to the '2019 China Bird's Nest Industry White Paper', the overall bird's nest market size has reached 30 billion yuan, with a compound annual growth rate of more than 30%, showing a sustained and rapid growth trend. As an iconic brand of freshly stewed bird's nest, Xiaoxian Stew continues to set new records. Data shows that the sales of freshly stewed bird's nests on Tmall have grown by more than 150% for two consecutive years from 2017 to 2019, which is more than twice that of ready-to-eat bird's nests. According to Tmall data, during the 2020 Double Eleven pre-sale period, bird's nest tonics increased by 168% year-on-year, and fresh stewed bird's nests increased by 100%. Among them, Xiaoxian Stew ranked first in the national sales of fresh stewed bird's nests for four consecutive years from 2017 to 2020, and has continued to do so. In three years, it has become the fastest growing bird's nest brand

in China.
