The global Insufflator market size is expected to reach \$ 348.5 million by 2029, rising at a market growth of 7.5% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Insufflator are W.O.M, Stryker, Karl Storz, Richard Wolf and Olympus, which make up over 40%. Among them, W.O.M is the leader with about 13% market share.

Europe is the largest market, with a share over 35%, followed by North America and China, with the share about 34% and 12%. In terms of product type, High Flow Insufflator occupies the largest share of the total market, over 60%. And in terms of application, the largest application is Laparoscopy, followed by Bariatric Surgery.

Insufflator is the basis of laparoscopic surgery. Its role is to establish an artificial pneumoperitoneum, which is separated from the abdominal wall and viscera by mechanical pressure and inflation of the pneumoperitoneum machine, so as to provide enough operating space for the operation, and to avoid the injury of viscera when puncturing the cannula into the abdominal cavity.
