The market for insulated cup sleeves continues to expand as the demand for hot and cold beverages on-the-go remains strong, making them a popular choice for both businesses and consumers.

Insulated cup sleeves, often referred to as cup cozies or cup holders, are protective and insulating covers designed to wrap around cups, mugs, or beverage containers. These sleeves are typically made from materials like neoprene, foam, or fabric and feature insulating properties that help keep the beverage inside the container at the desired temperature. Insulated cup sleeves serve several purposes, including protecting hands from hot or cold beverages, reducing condensation, and adding a decorative or branding element to the cup. They are commonly used in coffee shops and by individuals to enhance the comfort and functionality of disposable or reusable cups.
