Scope of the Report:

This report focuses on the Insulated Glass in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Insulating glass is a very effective way to reduce air-to-heat transfer through the glazing. When used in conjunction with low-E and/or reflective coatings, IG units perform even better for conserving energy and complying with local codes. The most common configuration of IG units for commercial building is a 6 mm lite, 12mm of air space and a 6mm lite.

The worldwide market for Insulated Glass is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
