## **Abstracts**

Insulated lunch box, as a frequently-used insulated containers, comes from insulated bottle and the thermal theory is similar to bottle. It can be classified into stainless steel type and plastic type by its lunch box shells and is filled with foam or vacuumized with specific equipment between two layers of shell. According to the theory of heat radiation, vacuum layer or insulating layer can block thermal transmission to keep fresh and thermal at least for a short time.

### **Scope of the Report:**

This report focuses on the Insulated Lunch Box in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. China is the largest production region with 63.60% production share in 2016. And Southeast Asia Pacific is gradually becoming a main production base of insulated lunch box for the time being. Due to the lower labor cost and raw material cost, many international brands have set up production base and cooperate with OEM in these countries.

The worldwide market for Insulated Lunch Box is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
