Abstracts

According to our (Global Info Research) latest study, the global Insulating Glass Units market size was valued at USD 37470 million in 2023 and is forecast to a readjusted size of USD 40590 million by 2030 with a CAGR of 1.1% during review period.

Insulating glass units, or IGUs, are designed to keep homes warmer in colder weather and cooler in warmer weather. An insulating glass unit commonly consists of two (sometimes more) panes of glass separated by a spacer material and sealed together at the edge. The insulating airspace is filled with air or a noble gas, such as argon or krypton inside, and some IGUs may be coated with special materials. This enables the glass to meet two very different requirements, keeping heat in during colder weather and keeping heat out during warmer weather.

Global Insulating Glass Units key players include CSG HOLDING, Yaohua Pilkington Glass, AGC, JIN JING GROUP, etc.

China is the largest market, with a share over 50%, followed by Europe, and NAM, both have a share about 30 percent.

In terms of product, Conventional Insulating Glass Units is the largest segment, with a share nearly 55%. And in terms of application, the largest application is Non-structural applications, followed by Structural glazing applications.
