Insulating thermally conductive adhesive is a type of single-component room temperature vulcanized silicone adhesive. It is easy to use, has high bonding strength, is elastic after curing, and is impact and vibration resistant. At the same time, its cured product also has good thermal conductivity and heat dissipation functions, as well as excellent high and low temperature resistance and electrical properties, such as aging resistance, moisture resistance, corona resistance, leakage resistance, and chemical resistance. This material can be used continuously at -60~280? (or -40~+220?, depending on the product type) and maintains performance, does not swell, and has good adhesion to most metal and non-metal materials.
