An insurance chatbot is a computer program or AI-powered virtual assistant designed to interact with users and provide information and assistance regarding insurance-related topics. It utilizes natural language processing and artificial intelligence algorithms to understand user queries and respond with relevant and accurate information.

Insurance chatbots can be deployed on various platforms, such as websites, mobile apps, messaging applications, or voice-based assistants. They aim to enhance customer service by providing instant and personalized responses to common inquiries, policy details, claims information, premium calculations, and more.
