Integrated Agricultural Drone Services refer to agricultural service solutions delivered through drones, flight control systems, spraying or spreading devices, remote sensing sensors, positioning systems and agricultural data platforms. These services are used in fields, orchards, plantations, pastures and other farming scenarios for crop spraying, seeding, fertilizer spreading, crop monitoring, field mapping, pest and weed identification and agronomic decision support. The service is part of agricultural operation outsourcing and precision farming, aiming to improve operating efficiency, reduce labor dependence and optimize the use of pesticides, fertilizers, water and labor resources through unmanned, digital and precision-based methods. The pricing of Integrated Agricultural Drone Services varies by service type and region, with crop spraying typically at USD 8?25 per acre, seeding and fertilizer spreading at USD 10?30 per acre, and field mapping or crop monitoring at USD 5?20 per acre or USD 500?1,500 per mission.

The upstream supply chain of Integrated Agricultural Drone Services mainly includes agricultural drones, flight control and navigation systems, batteries and propulsion systems, spraying pumps, valves and nozzles, spreading devices, multispectral and thermal imaging sensors, RTK positioning modules, pesticides, fertilizers and agricultural software for mapping, AI recognition and agronomic analytics. The midstream is composed of drone service operators, crop protection teams, agricultural service platforms, machinery cooperatives and precision agriculture data service

providers, which are responsible for equipment dispatching, pilot management, field operation, data collection and service delivery. Downstream customers include field crop growers, cooperatives, farm owners, orchards, plantation companies, agrochemical distributors, agricultural insurers, government agricultural agencies and large farming groups, with demand mainly focused on cost reduction, efficiency improvement, pest control, precision application, crop growth management and digital farm management.
