## Abstracts

According to our (Global Info Research) latest study, the global Integrated Brake Caliper market size was valued at USD 3308.1 million in 2022 and is forecast to a readjusted size of USD 4198.7 million by 2029 with a CAGR of 3.5% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The caliper is processed and manufactured as a whole, and the overall CNC cutting requires high material performance. If the caliper itself is not rigid enough, the probability of deformation of the caliper is high when braking vigorously, resulting in a sharp drop in braking force. The advantage is that the weight is compared with split calipers. More portable.
