Integrated HR Service Delivery Solutions (IHRSDS) are software platforms that provide a holistic way for organizations to manage their HR shared-service operations and communications while delivering “content in context” to employees and managers. These platforms typically include features such as ticketing, content and knowledge management, incident routing, SLA monitoring, single sign-on (SSO) into transactional systems, content delivery via manager/employee self-service portals, digital HR document management and business process management (BPM) tools. These tools usually integrate with administrative HR applications and may also link to enterprise portals and identity management applications. IHRSDS are often marketed as an HR knowledge base/portal solution with an integrated case management application.

The industry trend of IHRSDS is driven by the increasing complexity and diversity of network environments, especially with the adoption of cloud computing, hybrid networks, Internet of Things (IoT), and remote working practices. These factors create new challenges and opportunities for HR service delivery, such as expanding employee expectations, evolving compliance standards, growing talent shortages, and rising demand for automation and personalization.
