Integrated Online Analysis System (Analyzer Houses and Shelter) refers to complete process analytical systems that integrate analyzers, sampling systems, sample conditioning units, control systems, environmental control equipment, and protective shelters for continuous online monitoring and analysis of industrial process parameters. These systems are designed to provide reliable measurement of gas composition, chemical properties, emissions, and process conditions in complex industrial environments. Analyzer houses and shelters typically include explosion-proof structures, temperature and humidity control, ventilation systems, safety protection devices, and automated data communication functions. They are widely applied in oil and gas, petrochemical, chemical, power generation, metallurgy, environmental monitoring, and other process industries requiring continuous and accurate analysis.
