According to our (Global Info Research) latest study, the global Integrated Pitch Drive market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The integrated pitch drive is a pitch system for wind turbines that integrates the driver, charger, brake, temperature acquisition and other modules into a compact device to improve reliability, safety and design flexibility. The integrated pitch drive can effectively control synchronous, asynchronous or DC motors to adjust the angle of the wind turbine blades to adapt to different wind speeds and directions. The integrated pitch drive also offers functional safety and can feather the blades in an emergency to protect the wind turbine from overloading or damage.
