Abstracts

According to our (Global Info Research) latest study, the global Integrated Temperature Sensor market size was valued at US\$ 556 million in 2025 and is forecast to a readjusted size of US\$ 732 million by 2032 with a CAGR of 4.2% during review period.

In 2025, global sales of Integrated Temperature Sensor reached approximately 12 million units, with an average market price of about USD 45 per unit, an annual production capacity of roughly 15 million units, and an industry-average gross margin of approximately 28%.

The integrated temperature sensor is an integrated industrial temperature measuring instrument, belonging to the category of instrumentation equipment. It consists of temperature sensing elements such as thermocouples and resistance temperature detectors (RTDs) combined with a temperature transmitter module, and is mainly used in the field of industrial temperature monitoring. It adopts an all-stainless steel structure and supports explosion-proof and fire-resistant designs. The core module integrates a reference unit, signal conversion circuit, and multiple protection functions.

Upstream includes thermocouple wires, platinum RTD elements, stainless-steel protection tubes, flanges and compression fittings, terminal heads, electronic components, isolation/transmitter chips, cables, and explosion-proof accessories. Midstream involves temperature-probe manufacturing, transmitter-module design and assembly, calibration, pressure/explosion-proof certification, and final system integration. Downstream demand is concentrated in petrochemical, oil and gas, power generation, metallurgy, chemicals, pharmaceuticals, food and beverage, HVAC, boilers, reactors, heat exchangers, storage tanks, pipelines, and broader process-equipment

temperature monitoring and control. Endress+Hauser publicly states that its modular industrial thermometers are used in heat exchangers, dryers, reactors, and similar applications, while hazardous-area models target safety-critical sectors such as chemicals, oil and gas, and energy.
