In the process of traditional grassroots social governance, communities mainly use traditional governance methods such as manual registration forms, telephone calls and door-to-door visits, which are not only inefficient and repetitive, but also unable to meet the governance needs of urban mega-communities. Therefore, driven by the new situation of social management, the concept of 'smart city' has been gradually introduced into community management. It is proposed to take the happiness of

community people as the starting point, provide convenience for the community people by building smart community, thus accelerate the construction of harmonious community and promote regional social progress. The concept of 'smart community' construction is born.
