According to our (Global Info Research) latest study, the global Intelligent Electronic Guide Dog market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

The electronic guide dog is a new type of intelligent assistive device that adds new sensors and computing units to help visually impaired people with daily actions and navigation.

There are currently more than 40 million blind people in the world, but the number of truly qualified guide dogs does not exceed 100,000. Training a guide dog takes a long time and is expensive, and the working life of each guide dog is only about 10 years. At the same time, some visually impaired people are allergic to pets, and many public places do not allow guide dogs to enter. Therefore, it is not easy to popularize guide dogs. In this case, the emergence of electronic guide dogs has solved the shortcomings of guide dogs being expensive and having few use occasions.
