According to our (Global Info Research) latest study, the global Intelligent Elevator Management System market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Intelligent elevator floor control management system includes management center, main controller, car card reader and floor expansion controller. The management center communicates with the main controller in two directions; Two-way connection, the main controller receives the card information of the card reader in the car, and judges according to the card reading authority and floor authority set by the system, sends a control signal to the floor expansion controller, and activates the floor elevator button. At the same time, the main board receives the floor information sent by the intercom host, and automatically activates the corresponding floor buttons;

According to data released by the National Bureau of Statistics, China's elevator production in 2022 was 1.455 million units, which was down 5.8% compared to last year. After years of development, China has become the world's largest elevator producer and consumer. More than 70% of the world's elevator manufacturing business were in Chinese mainland, and 60%-65% of the world's elevators sold in the Chinese market. According to data from the China Elevator Association, by the end of 2022, the number of elevators registered in operation in China has reached 9.65 million, and more than 15,000 elevators have been installed after acceptance.
