Abstracts

Intelligent hearing protection devices (IHPDs) minimize noise exposure level and the risk of hearing loss, especially in extreme noise environments and remote work sites. However, understanding communications in extreme noise and at work sites is challenging while wearing hearing protection. Thus, with extreme protection a worker cannot hear and is vulnerable to other safety hazards, whereas inadequately protected workers are at a higher risk for noise-induced hearing loss. Therefore, intelligent hearing protection is essential to safeguard working professionals, provide situational awareness, and to streamline the process flow.
