## Abstracts

According to our (Global Info Research) latest study, the global Intelligent Molded Case Circuit Breaker market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Plastic case circuit breakers are also called device-type circuit breakers. Plastic case refers to the use of plastic insulators as the shell of the device to isolate conductors and grounded metal parts. All parts are sealed in plastic housing. The overcurrent release of the intelligent molded case circuit breaker is electronic. The rated current of the circuit breaker is adjustable according to the line load, and the three-stage protection curve is adjustable. It can cooperate with lower-level circuit breakers to achieve hierarchical protection. The electronic overcurrent release has high protection accuracy and is less affected by the ambient temperature and installation position. It is an upgraded product of the thermal magnetic overcurrent release.

With the emergence of new technologies including modern design technology, microelectronics technology, computer technology, computer network technology, communication technology, intelligent technology, reliability technology, testing technology, etc., as well as new processes, such as the technical and functional changes in low-voltage electrical appliances in the future There will be great development in all kinds of relays, contactors and circuit breakers. Electronic and intelligent control are widely used. Intelligent electrical appliances will develop from a simple closed device that uses microcomputer control to replace the traditional relay function to an electrical intelligent system with a complete theoretical system and multi-disciplinary interdisciplinary systems, and will become power switching equipment and power system relay protection in the field of electrical engineering. , the new

development direction of industrial supply and distribution systems and industrial control network technology.
