The global Intelligent Outdoor High Voltage AC Vacuum Circuit Breaker market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The high-voltage vacuum circuit breaker plays an important role in my country's power supply system. Its advantages such as light weight, simple structure and long service life are quickly recognized by the operation, maintenance and technical personnel of the power department. The quality of early domestically produced high-voltage vacuum circuit breakers was not stable enough. During operation, the current-carrying overvoltage was high, and some vacuum interrupters still had air leakage. The manufacturing technology of my country's vacuum circuit breakers has entered the forefront of the same type of products in the same industry, becoming a new historical turning point in the application and manufacturing technology of my country's high-voltage vacuum circuit breakers.

The intelligent outdoor high-voltage intelligent vacuum circuit breaker (referred to as 'intelligent circuit breaker') is an outdoor high-voltage switching device with three-phase AC 50Hz and rated voltage 12KV. It is suitable for breaking and closing the load current, overload current and short-circuit current of urban or rural power distribution systems.
