The global Intelligent Weighing System market size is expected to reach \$ 1794 million by 2029, rising at a market growth of 7.8% CAGR during the forecast period (2023-2029).

Intelligent weighing, while weighing the vehicle, it also automatically recognizes the license plate number through Yuebao intelligent license plate recognition all-in-one machine or license plate recognition software, and records the vehicle image and related information, weighing data and other information at the same time, which greatly saves weighing. The weighing time improves the work efficiency and effectively avoids the influence of human factors. With the intelligent weighing system, the vehicle information can be automatically uploaded to the management center to realize network operation.

Intelligent weighing can effectively reduce labor cost output; it is in line with the intelligent mode of modern enterprises; it is more convenient to automatically record the accuracy of data than manual recording; it can meet the needs of high-frequency production and effectively prevent cheating.
