Abstracts

Interactive advertising can be defined as a form of advertising that uses a feedback information from the users for whom advertisement is made. The feedback information from the users helps the advertiser to improve their advertising techniques. Interactive advertising can be referred to as online advertising but can be implied to offline advertising as well.

Scope of the Report:

The key trends in interactive advertising market includes reaching to mass audience in less time, invention of latest technology that are convenient for users, emergence of innovative ideas that are going to benefit users and proficient use of smartphone to generate money. The study indicates, the factors such as increase in mobile users owing to usage of multiple channels and device that boost the interactive advertising market. The efficient use of media technologies and creation of personalization media portals are one of the most significant factors fuelling interactive advertising market. According to the study, the growing social media networks and online and offline internet integration are the prime factors boosting interactive advertising market. The interactive advertising market can be segmented on the basis of type, organization size and vertical. By type the interactive advertising market consists of mobile advertising, videos, internet, social media marketing, email marketing, sponsorship, blogging, widgets, and offline activation. Social media marketing is the most cost efficient digital marketing technique. It enhances business by increasing brand awareness. It helps enterprises to get engage with broad range of audience and increase the business visibility.

The global Interactive Advertising market is valued at 40100 million USD in 2017 and is

expected to reach 92800 million USD by the end of 2023, growing at a CAGR of 15.0% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.
