## Abstracts

The global Interdigitated Back Contact (IBC) Solar Cell market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Interdigitated Back Contact (IBC) Solar Cell is a technology that moves both the positive and negative metal contacts of the solar cell to the back of the cell. The battery appeared in the 1970s and was the earliest researched back-junction battery. There is no grid line on the front of the battery, which greatly increases the light-receiving area of the battery sheet, thereby improving the battery efficiency.
