Abstracts

According to our (Global Info Research) latest study, the global Interior Stain market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Wood stain is a type of paint used to colour wood.

Wood stain consists of colourants dissolved and/or suspended in a 'vehicle' or solvent. Vehicle is the preferred term, as the contents of a stain may not be truly dissolved in the vehicle, but rather suspended, and thus the vehicle may not be a true solvent. The vehicle often may be water, alcohol, a petroleum distillate, or a finishing agent such as shellac, lacquer, varnish and polyurethane. Coloured or stained finishes do not typically deeply penetrate the pores of the wood and may largely disappear when the finish deteriorates or is removed.

In North America, Interior Stain key players include Sherwin-Williams, PPG, Cabot, RPM International, United Gilsonite Laboratories, etc. The top five manufacturers hold a share over 70%.

US is the largest market, with a share over 75%, followed by Canada and Mexico, both have a share over 20%.

In terms of product, Oil-Based Stain is the largest segment, with a share over 70%. And in terms of application, the largest application is Residential, followed by Commercial, etc.
