Interleukins are a group of cytokines (proteins) that play a crucial role in cell signaling and immune responses. They are produced by various cells of the immune system, such as leukocytes, macrophages, and lymphocytes, and they act as messengers between cells to regulate inflammation, immune responses, and hematopoiesis (the formation of blood cells).

Global key players of Interleukin include Bio-Techne, Cytiva, Lonza, etc. The top three players hold a share over 43%. North America is the largest market, with a share about 52%, followed by Europe and Asia-Pacific, with share 28% and 17%, separately. In terms of product type, Pharmaceutical Grade is the largest segment, occupied for a share of 73%. In terms of application, Medical is the largest, which has a share about 73 percent.
