Abstracts

The global Intermittent Catheters market size is expected to reach \$ 5431 million by 2032, rising at a market growth of 9.9% CAGR during the forecast period (2026-2032).

Urinary catheters are hollow, partially flexible tubes that collect urine from the bladder. Urinary catheters come in many sizes and types. There are three main types of catheters including: Indwelling Catheters (Urethral or Suprapubic Catheters), External Catheters (Condom Catheters) and Short-Term (Intermittent) Catheters. Intermittent catheters are intended to be used to provide an intermittent pathway for short term drainage of fluids from the bladder for either male (Nelaton and Tiemann) and female (Female) or for intravesical instillation.

The major players in global Intermittent Catheters market include Coloplast, Wellspect, Bard Medical, etc. The top 3 players occupy about 60% shares of the global market. Europe and North America are main markets, they occupy about 80% of the global market. PVC Intermittent Catheters is the main type, with a share about 40%. Male Patients is the main application, which holds a share about 45%.

?The intermittent catheters market is experiencing steady growth, influenced by various factors and trends:?

Rising Urinary Disorders: An increase in urinary diseases and conditions like urinary incontinence and neurogenic bladder disorders is boosting the demand for intermittent catheters. ?

Aging Population: The expanding elderly demographic, more susceptible to urological issues, is contributing to market growth.?

Preference for Minimally Invasive Procedures: There's a growing inclination towards less invasive treatments, enhancing the adoption of intermittent catheters.?

Technological Advancements: Innovations in catheter design, such as hydrophilic coatings and antimicrobial properties, are improving patient comfort and reducing infection risks.?

Home Healthcare Expansion: The shift towards home-based care is increasing the use of intermittent catheters, as patients seek convenient solutions for managing urological conditions.?

Sustainability Focus: Manufacturers are exploring eco-friendly materials and production methods to address environmental concerns.
