Abstracts

The global Internal Mould Release Agent (IMR) market size is expected to reach \$ 87.66 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

Internal Mould Release (IMR) Agent is a product that is dissolved in the resin mix, which is highly soluble in the carrier solvent i.e. styrene. During cure the product drops out of solution and migrates to the surface due to volumetric shrinkage, pressure and temperature.

Internal release agents are directly added to the composite material being molded during mixing to provide integrated release properties.

Global Internal Mould Release Agent (IMR) key players include Chem-Trend, AXEL, Chukyo, Yushi, Marbocote, Franklynn Industries, etc. Global top five manufacturers hold a share over 25%.

Asia Pacific is the largest market, with a share about 40%, followed by Europe, and North America, both have a share over 45 percent.

In terms of product, Solvent-based is the largest segment, with a share over 75%. And in terms of application, the largest application is Rubbers, followed by Thermosetting Resin, etc.

This report studies the global Internal Mould Release Agent (IMR) production, demand, key manufacturers, and key regions.
