Abstracts

The global Internet Advertising Technology Services market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Advertising technology (AdTech) is an umbrella term that refers to the tools and software advertisers use to reach audiences, run digital ad campaigns, and measure the effectiveness of digital ad campaigns. As the process of buying and selling digital ads has become more complex, ad tech has emerged to simplify the process. Common ad tech tools such as demand-side platforms are the integration of a set of technologies that allow advertisers to buy impressions and select audiences across numerous publisher sites. Now, ad technology enables advertisers and ad agencies to efficiently manage integrated ad campaigns. It also enables brands to get the most out of their budgets and helps maximize return on investment (ROI) on digital advertising. Ultimately, the ad tech environment enables advertisers to strategically plan and optimize their ad campaigns.
