## Abstracts

Internet Protocol television (IPTV) is the delivery of television content over Internet Protocol (IP) networks. This is in contrast to delivery through traditional terrestrial, satellite, and cable television formats. Unlike downloaded media, IPTV offers the ability to stream the source media continuously.

### SCOPE OF THE REPORT:

This report studies the Internet Protocol Television (iPTV) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Internet Protocol Television (iPTV) market by product type and applications/end industries. Improving internet infrastructure is transforming telecom operators into complement digital service providers (CDSP). At the same time, they are also transitioning towards broadband internet protocol, which leads end-users to access television as an IPTV service. Additionally, favorable government initiatives in India, such as digitization of cable TV and Direct-to-Home (DTH) services, are anticipated to open new avenues over the next few years.
