The global INTS3 Antibody market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The principle of the car massage chair is to use the mechanical rolling force and the extrusion of the mechanical force to perform massage. Generally, it exerts force on the spine, which makes people refreshed, eliminates fatigue, and achieves health care effects. Although the mechanical massage of a car massage chair is different from manual massage, it can relieve people's fatigue and bring physical and mental health. Except for hypertensive patients and overworked people, most people can use massage chairs, because the function of massage chairs is health care and fatigue relief. For some cervical spines, lower back pain can provide relief. The car massage chair can be used by both the elderly and the young, it can relieve physical discomfort, relieve pain, eliminate fatigue and quickly relax the body and mind. Regular use can promote human secretion, improve sleep quality, improve human immunity, and improve indigestion.
