The global In–Vitro Diagnostics (IVDs) Medical Device market size is expected to reach \$ 150150 million by 2029, rising at a market growth of 4.8% CAGR during the forecast period (2023-2029).

The key manufacturers of In-Vitro Diagnostics (IVDs) medical devices in the world include Roche, Abbott, Danaher, Siemens Healthcare, Thermo Fisher Scientific, Sysmex and BioMerieux, among which the top three manufacturers account for more than 40% of the market share. The global production of In-Vitro Diagnostics (IVDs) medical devices is mainly distributed in China, USA and Europe, among which China is the largest production region, accounting for nearly 10% of the market share. In terms of products, the growth rate of consumables is faster than that of instruments. At present, the market share exceeds 80%. In terms of application, hospital is the first application field, with more than 50% market share, followed by laboratory.

In Vitro Diagnostic (IVD) tests are a subset of medical devices. In vitro diagnostic products are those reagents, instruments, and systems intended for use in diagnosis of disease or other conditions, including a determination of the state of health, in order to cure, mitigate, treat, or prevent disease or its sequelae. Such products are intended for use in the collection, preparation, and examination of specimens taken from the human body.

In vitro diagnostics are tests that can detect diseases, conditions, or infections. Some tests are used in laboratory or other health professional settings and other tests are for consumers to use at home.

A medical device is an in vitro diagnostic medical device (IVD) if it is a reagents,

calibrator, control material, kit, specimen receptacle, software, instrument, apparatus, equipment or system, whether used alone or in combination with other diagnostic goods for in vitro use.
