The internal heat acupuncture and moxibustion therapeutic apparatus is a kind of medical equipment used to treat various health conditions in traditional Chinese medicine. Its design purpose is to apply heat to specific acupoints on the body, namely acupoints, to promote healing and restore the balance of energy flow in the body. This device typically consists of heating elements, such as moxa sticks or infrared lamps, used to heat acupoints. Some internal heat acupuncture and moxibustion therapeutic instruments also include electronic control systems for regulating the temperature and duration of treatment. The heat generated by this device is believed to stimulate blood flow and activate the body's natural healing process. It is often used in combination with other traditional Chinese medicine treatments, such as acupuncture and moxibustion, cupping and herbal medicine.
