Abstracts

According to our (Global Info Research) latest study, the global Ionic Liquid Catalysts market size was valued at US\$ 157 million in 2025 and is forecast to a readjusted size of US\$ 227 million by 2032 with a CAGR of 5.6% during review period.

Ionic liquid catalysts are organic salts that are liquid at or near room temperature, composed of organic cations and organic/inorganic anions. Due to their high design flexibility and tunable properties, they can be used as green solvents in reactions, or they can support metal catalysts to combine the advantages of homogeneous and heterogeneous catalysis, improving catalytic efficiency and selectivity. They are used in various organic synthesis reactions and are easily recyclable, thus avoiding environmental pollution.
