Abstracts

According to our (Global Info Research) latest study, the global IoT App Testing Service market size was valued at US\$ 428 million in 2025 and is forecast to a readjusted size of US\$ 753 million by 2032 with a CAGR of 8.1% during review period.

The IoT App Testing Service is an end-to-end quality validation service designed for IoT applications, smart devices, embedded software, mobile apps, cloud platforms, communication networks, and backend data services. Its objective is to ensure that IoT systems operate in a stable, secure, low-latency, and scalable manner within real-world usage scenarios. This service goes beyond merely testing mobile or web-based functionalities; it simultaneously validates device-side components, firmware, sensors, communication protocols, gateways, cloud platforms, APIs, data synchronization, network resilience, power consumption, security vulnerabilities, and multi-device compatibility.

The increasing connectivity of smart homes, the Industrial IoT, medical devices, connected vehicles, and urban infrastructure has significantly expanded the attack surface. IoT security testing must encompass firmware vulnerabilities, interface authentication, data encryption, communication protocols, cloud APIs, device hijacking, privacy breaches, and supply chain risks. Keysight's IoT security testing solutions emphasize the validation of embedded systems, communication protocols, and firmware security through automation, real-time analysis, and realistic attack simulations.

Different IoT sectors prioritize distinct testing areas: Smart homes focus on multi-device interconnectivity and user experience; the Industrial IoT prioritizes reliability, real-time

performance, and security; Medical IoT emphasizes data accuracy, regulatory compliance, and system stability; Connected Vehicles focus on low latency, functional safety, and OTA updates; and Smart Cities prioritize large-scale connectivity, network stability, and platform scalability. Consequently, testing service providers must offer industry-specific testing scenarios and standardized test cases.
