According to our (Global Info Research) latest study, the global IOT Connectivity Management Platform (CMP) market size was valued at USD 5573.9 million in 2023 and is forecast to a readjusted size of USD 15440 million by 2030 with a CAGR of 15.7% during review period.

A connectivity management platform (CMP) is a combination of connectivity services and management tools that enable your IoT and M2M projects worldwide. It allows businesses to connect their IoT project deployments, activate or deactivate SIMs, change tariff profiles, switch between different mobile network operators and define data consumption among other things.

According to our research, the number of global connected IoT devices was about 14 billion, grew by 18% compared to 2021. The data released by the Office of the Central Cyberspace Affairs Commission shows that, by the end of 2022, China has built and opened a total of 2.3 million 5G base stations. 110 cities across the country have reached the gigabit city construction standards. Gigabit optical network has the ability to cover more than 500 million households. IPv6 scale deployment application is deeply promoted. The number of active users exceeds 700 million, mobile network IPv6 traffic accounted for nearly 50%. The total size of China's data center racks exceeds 6.5 million standard racks, with an average annual growth rate of more than 30% in the past five years.
