IP PTZ security cameras typically have high-resolution image sensors that provide clear video and images, and are connected to the network, usually via Ethernet. This kind of camera allows remote control and monitoring. Users can remotely operate and adjust the camera through the network or special software to meet different monitoring needs. IP PTZ security cameras are usually used in places that require flexible monitoring, such as large buildings, parking lots, campuses, public squares, etc., providing an efficient and reliable monitoring solution.
