## Abstracts

According to our (Global Info Research) latest study, the global IP-VPN Web Hosting Service market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

An acronym for Internet Protocol Virtual Private Network, IPVPN is separated from the public internet, travelling via a private connection to each remote site. IPVPN also provides a high level of flexibility. VPN is a networking technology that allows users to connect to their main network remotely via the public internet. A VPN allows employees to work from home and connect to the company's intranet, giving them access to the shared files of their office computers. An IP VPN works in much the same way, establishing seamless connectivity to the main network across an ISP. However, it also uses multiprotocol label switching (MPLS) technology to prioritize internet traffic and avoid public gateway to increase security.
