Abstracts

Integration platform as a service (iPaaS) is a set of automated tools for connecting software applications that are deployed in different environments. iPaaS is often used by large business-to-business (B2B) enterprises that need to integrate on-premises applications and data with cloud applications and data.

Scope of the Report:

This report studies the IPaaS market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the IPaaS market by product type and applications/end industries.
IPaaS vendors supply the server and data infrastructures, as well as middleware and other software tools for building, testing, deploying and managing software applications in the cloud. Most iPaaS offerings include maps and transformations to speed up the development of integration flows as well as prebuilt connectors and business rules for defining interactions. Often, iPaaS services are shared in a multi-tenant setup.
The global IPaaS market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.
The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.
North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of IPaaS.
Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
