## **Abstracts**

According to our (Global Info Research) latest study, the global Iron (Ferrous Sulfate) market size was valued at US\$ 287 million in 2024 and is forecast to a readjusted size of USD 353 million by 2031 with a CAGR of 3.1% during review period.

Ferrous sulfate has three major forms, ferrous sulfate heptahydrate, ferrous sulfate monohydrate, and ferrous sulfate tetrahydrate. Ferrous sulfate heptahydrate is a direct byproduct of titanium dioxide, and ferrous sulfate monohydrate and ferrous sulfate tetrahydrate can be further processed from ferrous sulfate heptahydrate. Ferrous sulfate heptahydrate is a green, water soluble, acidic salt. It is commonly produced during the titanium dioxide (TiO<sub>2</sub>) manufacturing process, or as a byproduct of steel pickling.

Ferrous sulfate is mainly the byproduct during the titanium oxide production using sulfate process. Thus, most of ferrous sulfate manufacturers are global leading titanium oxide producers. As the by product is dangerous chemical, titanium oxide producers must have to handle ferrous sulfate appropriately. Many titanium oxide producers are puzzled by the handle of ferrous sulfate. Only a certain part of ferrous sulfate has been sold to external customers as a commodity, the remained parts are treated as waste. Titanium dioxide manufacturers are facing more pressure for handling of waste, commercialization of ferrous sulfate instead of treating as waste help them increase revenue and release environmental protection pressure synchronously.

Applications of ferrous sulfate mainly come from iron oxide pigment industry, water treatment industry, food industry, feed industry, cement industry, battery industry, agriculture, etc. Among them, iron oxide pigment industry is the largest consumer, with sales share staying at about 30%. In addition, as ferrous sulfate can be used to produce

iron phosphate, which is then used in the manufacture of lithium iron phosphate batteries. Demand from battery industry is the most promising driver of the ferrous sulfate industry. Some of ferrous sulfate producers in China are planning to enter into the iron phosphate industry, to stimulate their ferrous sulfate business as well as to get a piece of the pie in the related lithium iron phosphate batteries industry.
