The global Isoparaffin Solvents market size is expected to reach \$ 576 million by 2032, rising at a market growth of 3.0% CAGR during the forecast period (2026-2032).

Isoparaffin is a synthetic solvent with a unique combination of flash point, evaporation rate and boiling range. It is produced by using a carefully controlled process condition and feedstocks which give the resulting Isoparaffin a consistent structure, composition, performance properties and low impurities. It is odorless hence it suitable for use in printing inks, hand cleaners, odorless paints, photocopiers, dry cleaning, household sprays, fragrant polishes and wallpaper manufacture.

The global core manufacturers of Isoparaffin Solvents include Shell, ExxonMobil Chemical and Idemitsu. The top three companies have about 44 per cent of the market. China is the world's largest Isoparaffin Solvents market with a market share of about 29%, followed by the United States and Europe with a market share of 24% and 22%, respectively. In terms of product type, C12 is the largest segment with approximately 43% market share. In terms of application, Metalworking is the largest downstream segment, accounting for about 23% of the market.
