1,3-Dicyanobenzene, also known as isophthalonitrile (IPN), is often produced via an ammoxidation involving meta-xylene, oxygen and ammonia over a catalyst.

Scope of the Report:

This report focuses on the Isophthalonitrile (INP) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In 2017, the global isophthalonitrile market is leaded by Japan. China is the second-largest region-wise market.

Currently, Showa Denko, Mitsubishi Gas Chemical, Syngenta, SDS Biotech, CAC Group, Jiangsu Weunite Fine Chemical and Suli are major manufacturers of this industry. MGC is a global leader. In 2017, the sales of MGC was 54136 tons, and the company held a share of 57.88%.

The main application of isophthalonitrile is mainly reflected by the downstream M-Xylylenediamine. M-Xylylenediamine is a meta-xylene derivative, which is used in products such as epoxy resin curing agent, polyamide (Nylon-MXDA6) and isocyanate etc. Epoxy resin curing agent is a major application. In addition, isophthalonitrile is an important intermediate for the synthesis of chlorothalonil. Isophthalonitrile is an important intermediate. Most of the manufacturer's products are used for their own downstream products, and their products are rarely sold externally. The downstream applications of isophthalonitrile are very extensive. Isophthalonitrile is mainly used in epoxy curing agent, nylon Resin and pesticide.

Overall economic performance will continue to be the best indicator of future demand for isophthalonitrile. Demand in most downstream markets is greatly influenced by

general economic conditions. As a result, demand largely follows the patterns of the leading world economies.

The worldwide market for Isophthalonitrile (INP) is expected to grow at a CAGR of roughly 5.3% over the next five years, will reach 760 million US\$ in 2023, from 560 million US\$ in 2017, according to a new GIR (Global Info Research) study.
